

MEHWISH ASGHAR

Gujranwala, Pakistan | +92 327 7562801 | mehwishasghar.uni@gmail.com | <https://mehwishasghar-work.github.io/mehwishasghar.github.io/>

PROFILE

Software Engineering graduate (CGPA 3.56) with 2+ years of experience in Unity game development, AI programming, and undergraduate project mentorship. Led 60–70 FYP groups per semester and 200+ lab students in OOP, PF, HCI, and AI courses. Developed 10+ games (mobile/PC/VR) including a solo Steam title. Seeking fully-funded MSc in Computer Science / SE / Data Science or any CS Field.

EDUCATION

Bachelor of Science in Software Engineering <i>GIFT University, Gujranwala, Pakistan</i>	2019 – 2023 CGPA: 3.56 / 4.00
• Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Engineering, Computer Networks, Artificial Intelligence, Web/Mobile Development.	
Intermediate (I.Sc.) – Computer Science & Statistics <i>Punjab Group of Colleges, Gujranwala, Pakistan</i>	2017 – 2019
Matriculation – Computer Science <i>Science Locus School, Gujranwala, Pakistan</i>	2014 – 2016

RESEARCH & ACADEMIC PROJECTS

FarZone – Final Year Project (Team Lead & Core Developer) Tech: Unity 3D, C#, AI Systems, UI/UX	2022 – 2023
• Led a team of 4 students in designing and developing a third-person PC game with immersive character interactions, AI-driven enemies (state machines, pathfinding), dynamic day/night cycles, and cinematic cutscenes. • Designed core gameplay systems, AI behaviors, storyline, and level flow; implemented character controllers, enemy logic, and environment interactions. • Coordinated task distribution, code reviews, and integration; ensured timely delivery and alignment with academic requirements.	
Selected Academic Projects (Coursework) Tech: SQL, C#, C++, Java	2020 – 2021
• Online Movie Ticket Booking System: Designed a database-driven system with user registration, seat selection, show scheduling, and booking history using complex SQL queries and CRUD operations. • Supermarket Billing System: Built a transactional billing application utilizing stacks and queues data structures to manage high-efficiency item processing and user checkouts.	

INDUSTRY EXPERIENCE

Unity 3D Developer <i>Connect Technologies, Gujranwala, Pakistan</i>	Nov 2023 – Oct 2024
• Developed 5–6 mobile/PC games from scratch using Unity 3D and C#, implementing gameplay logic, AI behaviors (state machines, navmesh), UI/UX, and backend integration. • Delivered build updates and optimizations for 20+ released titles across iOS and Android, improving performance, fixing critical bugs, and enhancing player experience. • Conducted cross-platform testing and profiling; reduced crashes and frame-rate issues across multiple builds.	

Unity 3D Game Developer (Freelance / Indie, Remote)

Nov 2023 – Present

Self-Employed

- Developed 10+ complete games for Android, iOS, and PC, including single-player, multiplayer, VR, and client-specific projects.
- Solo-developed a full-cycle Steam PC game: designed storyline, characters, and cutscenes; implemented gameplay, AI, and UI/UX; managed build and release on Steam.
- Implemented AI-driven gameplay, networking (FishNet), and performance optimizations (object pooling, draw-call reduction) tailored to mobile and PC platforms.

TEACHING & LEADERSHIP EXPERIENCE

FYP Coordinator & Lab Instructor (Software Engineering / CS / DS)

Nov 2024 – Present

GIFT University, Gujranwala, Pakistan

- Coordinate and mentor 60–70 FYP groups per semester (4 students each; ~250+ students), guiding them from proposal to final defense across multiple software engineering and CS projects.
- Review project proposals, design documents, codebases, and final reports; ensure adherence to academic and technical standards.
- Conduct lab sessions for 4 sections per semester (~200+ students) in courses including OOP, Programming Fundamentals, HCI, and AI; support students in implementing algorithms, data structures, and software designs.
- Act as primary liaison between students, faculty, and evaluation committees; schedule reviews, mid/final defenses, and resolve technical/administrative issues, contributing to improved on-time project completion.

LEADERSHIP & VOLUNTEER EXPERIENCE

President

2020 – 2023

Fatima Jinnah Professional Forum, GIFT University

- Led a team of 30+ members to organize seminars, workshops, campaigns, and professional development events for students.
- Coordinated with faculty, industry speakers, and external partners; managed budgets, logistics, and promotion to increase student participation.

Vice President & Graphic Designer

2020 – 2023

Young Computer Professionals Society, GIFT University

- Supported the president in planning technical events, competitions, and guest sessions; oversaw marketing asset pipelines, poster designs, and social media content promotion.
- Assisted in logistical arrangements and on-ground execution of computer science seminars, hackathons, and professional workshops.

SKILLS

- **Programming Languages:** C#, Java, Python, JavaScript, SQL
- **Game Development:** Unity 3D, AI Programming, Multiplayer Networking (FishNet), UI/UX, Performance Optimization, VR
- **Tools & Platforms:** Visual Studio, Unity Hub, Git/GitHub, Blender (basic), Adobe Photoshop (basic), Firebase, Steamworks
- **Databases:** MySQL / SQL Server
- **Areas of Interest:** Artificial Intelligence, Game AI, Software Engineering, Data Science
- **Soft Skills:** Project Coordination, Student Mentorship, Communication, Team Leadership, Task & Deadline Management

Languages: Urdu (Native), English (Proficient – C1 reading/writing, B2–C1 speaking) | **References:** Available upon request
